

Chapter One Science: Classifying Living Things Objectives

Lesson 1

- 1) How are living things classified?
- 2) Compare characteristics of living things.
- 3) Explain the system of organizing living things into kingdoms.
- 4) Compare and contrast the kingdoms of life.
- 5) Define viruses.

Lesson 2

- 1) How are leaves classified?
- 2) Compare and contrast vascular and nonvascular plants.
- 3) Distinguish between kinds of seed plants.

4) Explain various ways plants reproduce.

Lesson 3

1) Explore the differences among invertebrates.

2) Compare and contrast the phyla of invertebrates.

3) How do people interact with invertebrates?

Lesson 4

1) How are invertebrates compared?

2) Compare and contrast the classes of vertebrates.

3) Discuss how people can help save endangered species.
